SUMMARY

Information Technology undergraduate with hands-on experience building production-grade full-stack applications and scalable REST APIs. Skilled in backend service design, JWT-based authentication, relational database management, and containerized cloud deployment with Docker. Comfortable working across the full stack — from API design to responsive frontend delivery — with experience integrating third-party services and AI APIs. Seeking Full Stack Developer roles in fast-paced product teams.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Backend: Spring Boot 3, REST API Design, JWT Authentication, Hibernate, Maven, Apache Tika, Spring AI

Frontend: React.js, React Router, Vite, Tailwind CSS, HTML5, CSS3

Databases: MySQL, PostgreSQL, pgvector, MongoDB

DevOps & Tools: Docker, Git, GitHub, Agile/Scrum, Vercel, Render

AI / Integrations: OpenAI API, Groq API, Puter.js, LLM Integration, Prompt Engineering, RAG Systems

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Java Developer Intern

May 2025 – June 2025

Vercen Technologies Pvt Ltd

India

- Designed and developed 5+ REST APIs using Spring Boot for enterprise application modules with clean, scalable architecture.
- Optimized MySQL queries and improved API response handling, reducing latency for production-grade systems.
- Participated in Agile sprint cycles — sprint planning, code reviews, unit testing, and deployment activities.

PROJECTS

DocuBot Pro – AI Document Chat Application

Spring Boot, React.js, PostgreSQL, pgvector, Groq API, Docker

- Built a production-deployed full-stack app enabling users to upload documents and query them via a conversational AI interface.
- Engineered Spring Boot backend with 10+ REST APIs, JWT auth, Apache Tika document parsing, and pgvector semantic search.
- Developed responsive React.js frontend with real-time chat, document upload, and auth flows using React Router and Tailwind CSS.
- Containerized with Docker and deployed on Render (backend) and Vercel (frontend), achieving sub-second query latency end-to-end.

TaskBrain AI – Employee Allocation & Monitoring Platform

Spring Boot, React.js, MySQL, JWT, OpenAI API

- Built a full-stack platform for allocating and monitoring employee tasks, with 10+ REST APIs covering CRUD, authentication, and workflow tracking.
- Integrated OpenAI API for AI-driven workload insights and implemented JWT-based authentication with role-based access control.

AI Resume Analyzer

React.js, Puter.js, Tailwind CSS, Prompt Engineering

- Built an AI-powered resume evaluation tool using Puter.js for serverless AI integration and backend authentication.
- Implemented LLM-based ATS scoring, keyword extraction, and job-match recommendations from a single-page React frontend.

EDUCATION

Bachelor of Technology in Information Technology

2023 – 2027

SNS College of Technology

Coimbatore, India

– **CGPA:** 8.16/10

– Coursework: Data Structures & Algorithms, DBMS, OOP, OS, Computer Networks, Machine Learning, Generative AI

ACHIEVEMENTS

Solved **240+** **LeetCode problems** across arrays, trees, graphs, DP, and optimization — contest rating ~1500.

Built and deployed **5+** **production full-stack applications** integrating Spring Boot, React.js, Docker, and third-party APIs.

Shipped **DocuBot Pro** end-to-end: full-stack architecture, Docker containerization, and cloud deployment on Render + Vercel.
